Re.: U.S. Patent Application No. 10/812,417

Dear Examiner Pham,

Thank you for agreeing to conduct a personal interview for the above-identified case during the week of July 28, 2008.

In the interview, we intend to discuss how the applied references are not seen to disclose, teach, or to suggest the features recited by the independent claims. Nevertheless, in a genuine effort to advance prosecution, we also intend to discuss the following proposed claim.

- X. (Proposed For Discussion Only – Do Not Enter) A method comprising the steps of:
- selecting one or more evaluators to rate a document;
  - passing the document to the one or more evaluators;
  - receiving rating information associated with contents of the document from the one or more evaluators;
  - identifying at least one a respective trust score for each of the one or more evaluators, each trust score based on factors associated with a respective evaluator, wherein the at least one trust score is associated with a specific one of the one or more evaluators;
  - identifying a respective sensitivity score for each of the one or more evaluators;
  - determining an aggregate rating for the document based on the rating information, the trust scores, and the sensitivity scores and the at least one trust score;
  - identifying a suitability score associated with a recipient;
  - receiving a signal relevant to a criteria; and
  - determining whether to deliver the document in response to the signal based on the criteria, and the aggregate rating, and the suitability score.
